FUEL TANKS

2300L • 4595L Split • 4600L

SIGN-OFF FORM

Meridian Manufacturing Inc. follows the general Safety Standards specified by the American Society of Agricultural Engineers (ASAE), and the Occupational Safety and Health Administration (OSHA). Anyone who will be using or maintaining the fuel tank must read and clearly understand ALL Safety and Maintenance information presented in this manual.

Review this information annually, before the season start-up.

Make these periodic reviews of SAFETY and USAGE a standard practice for all of your equipment.

This form is provided for your record keeping to show that all personnel who will be working with the equipment have read and understand the information in this manual. Copy this page to continue record.

[illegible]

PRODUCT REGISTRATION FORM

Attention Dealers:

You can register products online through the Dealer Login: <http://dealers.meridianmfg.com/login/>

It is mandatory to register your product in order to qualify for future warranty claims that may arise. Knowingly falsifying information on this form will result in the voiding of the product warranty.

You may scan/photograph this completed form (must be legible), email it to: register@meridianmfg.com
A copy of this form may also be mailed to Meridian Manufacturing Inc.

Buyer's Name _____	Dealer's Name _____
Address _____	Address _____
City, Prov/State _____	City, Prov/State _____
Postal/Zip Code _____	Postal/Zip Code _____
Phone Number _____	Phone Number _____

Note: Registering a product in multiple entry format is only allowed when the product has the same model number and the same dealer, however each serial number must be legibly listed for each unit. Delivery dates for a multiple entry must be within a one month time frame.

Product Information _____

Model Number _____	Serial Number _____
Invoice Date _____	

Important: Please send this form to the Meridian Manufacturing Inc. location which built this product being registered. If you require further assistance call you're dealer or the Meridian outlet nearest to your location.

We want to thank you for purchasing a Meridian manufactured product. Whether this is your first Meridian purchase or you have been a customer for years, you are now part of the Meridian community of customers and we appreciate your business.

It is important that you now complete the product registration information and this form indicating you have received delivery. This registration and information is necessary to ensure you have access to warranty and product updates in the event it be required in the future.

Registration can be completed by using this form or visiting your dealer who will complete the form online. You will be given access to the Meridian Community and become eligible for updates, special offers and prizes.

Again thank you for choosing Meridian.

I have thoroughly instructed the buyer on the above described equipment. The review included the content of this manual, equipment care, adjustments, safe operation and warranty policy.

Date _____ Dealer's Signature _____

The above equipment and this manual have been received by me. I have been thoroughly instructed as to care, adjustments, safe operation and applicable warranty policy.

Date _____ Buyer's Signature _____

Section 1: INTRODUCTION

Thank you for purchasing a Meridian® Fuel Tank and putting your trust in our hands. Setting the standard for excellence in the storage and fuel handling industry, our double wall fuel tanks meet and exceed all safety and environmental standards. Built with meticulous attention to detail by an enthusiastic and skilled production team our best references are thousands of customers, like you, who have placed their trust in our superior design and technology.

Codes, Regulations and Guidelines:

Built to exacting standards, your fuel tank is designed to give years of environmentally safe, trouble free use. To ensure this performance, it is critical that everyone who will be working around or maintaining the tank, read and understand the Safety, Operation and Maintenance information within this manual.

Fuel storage tanks fall under a variety of governmental jurisdictions; therefore the references in this manual are provided only as a general outline. You may be subject to different legislation and governing bodies in your specific location.

IT IS THE TANK OWNER'S RESPONSIBILITY TO DETERMINE WHAT CODES AND REGULATIONS MUST BE FOLLOWED IN YOUR LOCAL AREA

Meridian Manufacturing Inc. assumes no responsibility for any errors that may appear in this manual and shall not be liable under any circumstances for incidental, consequential or punitive damages in connection with, or arising from, the use of this manual. Information provided herein is of a descriptive nature. Consistent with Meridian's policy of continued research and development of our products, we reserve the right to modify the equipment design and specifications and change information contained in this publication without any preliminary notice.

1.1 SERIAL NUMBER

The serial number is located at the rear.

Have the serial number available when communicating with the dealer or factory and requesting service or asking for information.

Tank Model No: _____

Tank Serial No: _____

Auxiliary Equip: _____

Fig 1 - Serial number located at the rear of tank

The 2300L, 4595L Split Tank and 4600L fuel tanks are designed to meet CAN/ULC-S601-14 standards for strength and durability. They can accommodate a variety of fuel types and features a 100% containment system that is designed to prevent costly leaks.

These single and double walled steel lined tanks are also feature a long lasting durable powder coat paint finish. With proper care and handling this tank will provide many years of environmentally safe fuel storage.

Standard Features:

- CAN/ULC-S601-14 Approved
- 100% Secondary Containment
- Heavy Gauge Construction
- Lifting Lugs
- Emergency Vents
- Spare Fittings Ports
- Sturdy Cradle
- Premium Powder Coat Finish

Options:

- Sturdy cradle option or fully welded heavy duty saddle
- 4959L tank: 70/30 or 50/50 split options

Section 2: SAFETY

3 Big Reasons why safety is important to you:

- Accidents Disable and Kill
- Accidents Cost
- Accidents Can Be Avoided

The Safety Alert Symbol means:

ATTENTION!
BECOME ALERT!
YOUR SAFETY IS INVOLVED!

The Safety Alert Symbol identifies important safety messages on the fuel tank and in this manual.

The following signal words are used in this manual to express the degree of hazard for areas of personal safety.

When you see the symbol and/or the signal words described below, obey the accompanying message to avoid possible injury or death.

Indicates a hazardous situation that, if not avoided, will result in death or serious injury. This signal word is limited to the most extreme situations. Typically for machine components which, for functional purposes, cannot be guarded.

Indicates a hazardous situation, if not avoided, could result in death or serious injury. This word identifies hazards that are exposed when guards are removed. It may be used to alert against unsafe practices.

Indicates a hazardous situation, if not avoided, could result in minor or moderate injury. It may be used to alert against unsafe practices.

Indicates practices or situations which may result in the malfunction of, or damage to equipment.

Safety instructions (or equivalent) signs indicate specific safety-related instructions or procedures.

2.1 SAFETY ORIENTATION

YOU are responsible for the SAFE usage and maintenance of your Meridian® Fuel Tank. Be sure that everyone who will maintain or work around it, is familiar with the safety, maintenance procedures.

This manual will take you step-by-step through your working day. It will alert you to all the safe practices that should be adhered to while using the tank.

It has been said, "The best safety feature is an informed, careful worker" Good safety practices not only protect you but also the people around you. Make these practices a dynamic part of your workday.

Most accidents can be prevented. Do not risk injury or death by ignoring good safety practices.

- Fuel tank owners must give instructions to employees before allowing them to use the tank.

Procedures must be reviewed annually thereafter, as per OSHA (Occupational Safety and Health Administration) regulation 1928.57.

- Develop a comprehensive safety program for your work area.
- The most important safety device is a SAFE worker. It is their responsibility to understand all safety and usage instructions in this document, and to follow them.
- An untrained worker exposes himself and bystanders to possible serious injury or death.
- Think SAFETY! Work SAFELY!

2.2 GENERAL SAFETY

- Read and understand the owner's manual and all safety decals before using or maintaining the fuel tank.

- Only trained, competent persons shall use the tank. An untrained person is not qualified to use it and operate its auxiliary equipment.

- Have a first-aid kit available for use should the need arise.

- Provide a fire extinguisher for use in case of an accident. Store in a highly visible place.

- Use this fuel tank for its intended purpose only.

- This tank is not intended for use by children.

- Wear personal protective equipment (PPE). This list may include but is not limited to:

- Hard hat
- Protective shoes with slip resistant soles
- Eye protection
- Work gloves
- Hearing protection
- Respirator or filter mask
- Hi-Visibility safety vest

- Stay away from power lines. Electrocutation can occur without direct contact.

- Never use alcoholic beverages or drugs which can hinder alertness or coordination while using the equipment.

Consult your doctor about operating machine while taking prescription medications.

- If the elderly are assisting with farm work, their physical limitations need to be recognized and accommodated.

2.3 EQUIPMENT SAFETY GUIDELINES

- Safety of the workers and bystanders is one of the main concerns when designing and developing this fuel tank. However, every year many accidents occur which could have been avoided by a few seconds of thought, and a more careful approach to handling equipment.
- Do not allow personnel to use this tank until they have read this manual. They should have a thorough understanding of the safety precautions.

Review the safety instructions with all users annually.

- In order to provide a better view, certain photographs or illustrations in this manual may show an assembly with safety guards removed.

Equipment should never be used in this condition. All guards must be in place. If removal becomes necessary for repairs, replace the guard prior to use.

- This equipment is dangerous to children and persons unfamiliar with its operation.

The operator must be responsible, properly trained and physically able. You should be familiar with farm machinery in general.

- DO NOT lift or attempt to transport the tank, containing fluid, at any time.
- Never exceed the limits of a piece of machinery. If its ability to do a job, or to do so safely, is in question - DO NOT TRY IT.
- Do not modify the equipment in any way. Unauthorized modification result in serious injury or death and may impair the function and life of the equipment.

2.4 SAFETY DECALS

- Keep safety decals clean/legible at all times.
- Replace safety decals that are missing or have become illegible.
- All safety decals have a part number in the lower right hand corner. Use this part number when ordering replacements.
- Safety decals are available from your authorized distributor, dealer's parts department or from the factory.

2.4.1 Applying Decals:

1. Be sure the application area is clean and dry. Ensure the surrounding temperature is above 10°C (50°F).
 - Remove all dirt, grease, wax from the surface.
 - Clean with a non-ammonia based cleaner.
 - Wipe the clean surface with isopropyl alcohol on paper towel, and allow to dry.
2. Determine the exact position before you remove the backing paper.
3. Peel a small portion of the split backing paper.
4. Align the decal over the specified area. Use a squeegee to carefully press the small portion, with the exposed adhesive backing, into place.
5. Slowly peel back the remaining paper and carefully smooth the rest of the decal into place.
6. Small air pockets can be pierced with a pin and smoothed out using the squeegee, or a piece of sign backing paper.

2.5 SAFETY DECAL LOCATION

The following illustrations show the general location of safety decals on fuel tanks. The position of decals may vary depending on the tank's options. Decals are not shown at actual size.

1. ULC Plate (part #20027)
Located on rear of tank

2. Serial Number Decal
Located below ULC Plate

3. Emergency Venting Decal (part #20105)
Located below emergency vents

4. Containment Inspection Warning Decal (part #20045)
Located below containment inspection port

5. Lifting Lug Warning Decal (part #19037)
Located below lifting lug

6. Vent Warning Decal (part #20026)
Located below 3" port

7. Fill Warning Decal (part #20022)
Located below vented fill cap

8. Danger Safety Decal (part #20048)
Located on both ends of tank

9. Consult Authority Decal (part #20046)
Located on front, below safety decal

Fig 2 - Rear of fuel tank

Fig 3 - 2300 L decal location

Fig 4 - 4595 L decal location

Fig 5 - 4600 L decal location

2.6 ENVIRONMENTAL REGULATIONS

- The fuel tank installer shall ensure that all environmental requirements are taken and implemented in accordance with the local authority having jurisdiction.
- This tank must be installed by a qualified tank installer who shall consult with the proper authorities with jurisdiction to ensure all requirements of CAN/ULC-S601-14 and all Federal, Provincial and Local codes are being met prior to installation. Failure to do so, could void your warranty.
- **Protect Fuel Tank Against Vehicle Traffic:**
The installer is to ensure that the fuel tank is adequately protected against damage from vehicular traffic in compliance with all Federal, Provincial and Local Codes.
- **Regular Inspection and Maintenance:**
The fuel tank is to be inspected annually and any repairs to the exterior coating shall be made at the time of inspection in accordance with the coating manufacturer's instructions.

2.7 FUEL TANK SAFETY

- Do not lift or transport the tank when it contains fluid.
- Install the tank away from buildings, property lines, public paths or high traffic areas.
- Protect the tank against damage from vehicular traffic in compliance with all Federal, Provincial and Local Codes.
- Install the tank on a well prepared, level base designed to hold the tank full of liquid.

2.8 FUEL TRANSFER SAFETY

- Procedures must be in place when transferring fuel from a delivery vehicle to the tank. Although some transfer procedures are unique to some facilities, the following general safety procedures must always be followed:
 - Read operator manual before using fuel tank.
 - DO NOT smoke when operating or refueling the fuel tank.
 - Keep sparks, flames & hot material away from the fuel tank.
 - Turn vehicle ignition off and remove key from ignition before refueling.
 - Keep vehicles at least 1.5 m (5') away from the fuel tank at all times.
 - Never leave the tank unattended while refueling is in process.
 - DO NOT overfill. 95% capacity is the maximum legal limit.
 - Always turn pump off when finished fueling operations.
 - Always store pump nozzle in drip pot when not in operation.
- ALWAYS determine how much fuel your tank can safely hold. Over filling the tank will cause spills. Check the fuel level by dip checking the tank prior to any fuel transfer. Instructions on the correct procedure for dip checking a tank can be found in this manual.
- DO NOT OVERFILL. Determine a Safe Gauge Height (SGH) this is how much fuel a tank can hold allowing for expansion due to temperature variations. A good rule of thumb is in summer months the tank should not be more than 90% full and in winter the tank should not be more than 95% full.
- ALWAYS start the fuel transfer at a reduced rate. This reduces the potential for the build up of static electricity.
- ALWAYS maintain good communication with the driver of the delivery vehicle. Poor communication between the tank operator and the delivery driver often leads to spills and accidents.

This page intentionally left blank

Section 3: SITE AND INSTALLATION

WARNING

- Read and understand the Operator's Manual, and all safety decals, before using.
- Never lift or attempt to transport tanks containing fluid.
- Inspected the fuel tank annually.
- Ensure that all environmental requirements are taken and implemented in accordance with the local authority having jurisdiction.
- Ensure that the fuel tank is adequately protected against damage from vehicular traffic in compliance with all Federal, Provincial and Local Codes.

This document only covers general installation instructions. Consult the correct authority having jurisdiction in your area prior to tank installation.

IMPORTANT:

This tank must be installed by a qualified tank installer who shall consult with the proper authorities with jurisdiction to ensure all requirements of CAN/ULC-S601-14 and all Federal, Provincial and Local codes are being met prior to installation. Failure to do so, could void your warranty.

Note:

All timber/crates used in shipping must be completely removed from the tank prior to installation.

Choosing a Location:

The tank shall be placed at a safe distance from buildings, other tanks, roadways, waterways, property lines and all public paths. Refer to local authorities for applicable codes.

Fig 6 - Tank location

Installing the Fuel Tank Base:

The tank must be installed on a level base designed to support the tank weight plus 100% liquid loading.

The tank skid, saddle or cradle shall be the only part of the tank in contact with the foundation or base.

Lifting and Transporting Fuel Tanks:

Only the lifting lug weldments on the tank shall be used for unloading or transporting the empty fuel tank. DO NOT lift or transport tanks containing fluid at any time.

Fig 7 - Level base

Inspecting Fuel Tanks:

The tank installer shall ensure that all fittings, have not loosened during transportation. They must be sealed and tight.

Check all painted areas of the tank for damage due to shipping and also at final installation. All scratched or scuffed areas must be touched up with paint prior to use. If the damages are deemed to affect the integrity of the tank, contact your distributor or dealer prior to putting any product in the tank.

Installation of Tank Venting:

All primary and secondary, normal and emergency vents are to be installed before the tank is placed into service. The design of the normal vent will not allow flame impingement onto the surface of the tank in the event of vapor ignition.

Fig 8 - Lift lug and dip stick

Inspecting Fuel Tank Containment System:

The containment should be checked on a regular basis, to confirm that neither product nor water has accumulated therein. Take immediate remedial action if product or water is found. The disposal of any liquid found in the containment shall be disposed of in accordance with the requirements of the authority having jurisdiction.

Environmental Regulations:

The fuel tank installer shall ensure that all environmental requirements are taken and implemented in accordance with the local authority having jurisdiction.

Protect Fuel Tank Against Vehicle Traffic:

The installer is to ensure that the fuel tank is adequately protected against damage from vehicular traffic in compliance with all Federal, Provincial and Local Codes.

Regular Inspection and Maintenance:

The fuel tank is to be inspected annually. All repairs to the exterior coating shall be made at the time of inspection in accordance with the coating manufacturer's instructions.

This page intentionally left blank

Section 4: OPERATION

WARNING

- Read and understand the Operator's Manual, and all safety decals, before using.
- DO NOT smoke when operating/refueling the fuel tank.
- Keep sparks, flames & hot material away from the fuel tank.
- Turn vehicle ignition off and remove key from ignition before refueling.
- Keep vehicles at least 1.5 m (5') away from the fuel tank at all times.
- NEVER leave the tank unattended while refueling is in process.
- ALWAYS turn pump off when finished fueling.
- DO NOT OVERFILL. 95% capacity is the maximum legal limit.
- ALWAYS store pump nozzle in drip pot when not in operation.
- ALWAYS determine how much fuel your tank can safely hold. Over filling the tank will cause spills. Check the fuel level by dip checking the tank prior to any fuel transfer.
- ALWAYS start the fuel transfer at a reduced rate. This reduces the potential for the build up of static electricity.
- ALWAYS maintain good communication with the driver of the delivery vehicle.

It is the responsibility of the owner and operators to read this manual and to train all personnel before they start working with this tank. Follow all safety instructions exactly - it is everyone's business. By following recommended procedure, a safe working environment is provided for the operator, co-workers and bystanders in the area around the work site.

The design and configuration of this tank includes safety decals and equipment. Hazard controls and accident prevention are dependent upon the personnel operating and maintaining it. Their awareness, concern, prudence and proper training are crucial.

4.1 TANK COMPONENTS

Fig 9 - 2300 Litre Double Wall Fuel Tank components

Fig 10 - 2300 Litre Single Wall Utility Tank components

Fig 11 - 4595 Litre Double Wall fuel tank components.
50/50 Split shown

Fig 12 - 4600 Litre Double Wall fuel tank components

Fig 13 - 4600 Litre Single Wall Utility Tank components

4.2 INSTRUCTIONS FOR SPILL CONTAINMENT DEVICE

1. The delivery personnel shall ensure that all applicable Federal, Provincial and Local Codes are met during the filling of the tank.
2. The delivery personnel shall be familiar with, and trained on, proper above ground tank filling procedures.
3. The delivery personnel responsible for transferring product to an above ground tank shall take all reasonable steps to prevent spillage.
4. The delivery personnel shall remain in constant view of the transfer nozzle and fill pipe and shall be in constant attendance at the discharge control valve when the tank vehicle is being unloaded.

4.3 TOP FILL FUEL TRANSFER

WARNING

DO NOT dispense fuel when transfer is in process

1. Have a pre-transfer meeting with the operator of the delivery vehicle to determine the correct product is being transferred into the correct tank.
 - Check the tank's fuel level to confirm the amount of fuel to be added.
 2. Inspect the tank:
 - Check that the vents are unobstructed.
 - Check the transfer hose for leaks, cracks or damage. If leaks are present or later appear, stop transfer, repair as necessary.
 3. Wipe area around the vented fill cap with a clean cloth or rag to remove risk of fuel contamination. See Figure 16
 4. Open vented fill cap and place cap in a clean secure location. Insert the delivery nozzle into the fill port See Figure 16
- Note:**
2300L, 4595L and 4600L tank models operate with a fill port.
Tank models over 10,000L this is replaced with a 3 inch male cam and drop tube.
5. Start delivery vehicle pump, depress delivery nozzle handle and slowly begin fuel transfer. Only increase the flow of the product from the delivery vehicle when you are sure there are no problems.
 6. DO NOT WALK AWAY DURING TRANSFER.
 - Continuously monitor the transfer of fuel.
 - At all times, keep open communication between the delivery vehicle and tank operator.
 7. Regularly check fuel tank levels.
 - Reduce fuel transfer rates when nearing the top of the tank to avoid overfilling the tanks.
 - Notify the delivery vehicle operator when the transfer procedure is almost complete.
 8. Release the handle on the delivery nozzle.
 9. Turn off the delivery vehicle delivery pump.
 10. Remove delivery nozzle from the fill port.
 - Secure hose and nozzle on delivery vehicle.
 11. Conduct a post-transfer meeting between the delivery operator and tank operator.
 12. Dip tanks and record amount of fuel delivered.
 13. Replace vented fill cap over the fill port.

Fig 15 - Leak in transfer hose

Fig 16 - 2-1/2" port with fill cap

4.4 MEASURING FUEL TANK LEVEL

DANGER

Never smoke around the fuel tank or expose the tank to direct flame.

Note:

For more accurate results wait 30 - 60 mins after refueling then dip check the tanks. This allows fuel to settle and will give more accurate readings.

1. Remove the dip stick from its storage location at the side of the tank.
 - Wipe off the stick to remove dust and debris, so the tank will not be contaminated.
2. Remove the vented fill cap and insert the dip stick into the tank until it reaches the bottom.

Note:

Ensure the dip stick is inserted with the lowest number on the dip stick placed toward the bottom of the tank.

3. Take note of the amount of fuel, in centimeters (cm), that is showing on the stick.
4. Replace the vented fill cap.
5. Compare the number of centimeters on the dip stick with the Fuel Tank Dip Chart in this manual to determine the amount of fuel in the tank. Refer to the charts in Section 7.

Fig 17 - Dip stick location

Fig 18 - Dip stick

Fig 19 - Fill cap

4.5 PUMP OPERATION

WARNING

Always keep the nozzle in contact with the container being filled during the filling process to minimize the possibility of static electricity build up.

The 2300L and 4600L DW Fuel Tanks each come with three different pump options. Dependent on the pump option associated with your tank consult the correct Installation and Operator Manual provided at time of purchase for detailed pump installation, operation and maintenance procedures.

4.5.1 Dispensing Fuel (General):

1. Reset Meter to "0" (if applicable).
 - Do not reset meter while dispensing fuel.
2. Remove dispensing nozzle from the nozzle boot or drip pot.
3. Move the switch lever to the "ON" position to power the pump.
4. Insert the dispensing nozzle into the container to be filled.
5. Operate the nozzle to dispense fluid; release nozzle when the desired amount of fluid has been dispensed.
6. Move switch lever to the "OFF" position to stop the pump.
7. Remove the dispensing nozzle from the container and store it in the nozzle boot or drip pot.

4.5.2 Locking The Pump:

Dependent on the pump options selected, the pump nozzle can be pad locked for added security. With the pump turned off, and the nozzle in the stored position, a pad lock can be inserted through the locking link and the nozzle handle opening. This configuration prevents the nozzle from being removed from the nozzle cover.

Optional drip pots and chains are also available (see Figure 21). The chain can be wrapped around the nozzle and secured with a padlock. This secures the nozzle when not in use or when the tank is left unattended for long periods of time.

Fig 20 - Pump operation

Fig 21 - Nozzle boot

Section 5: SERVICE AND MAINTENANCE

WARNING

- Read and understand the Operator's Manual, and all safety decals.
- Keep sparks, flames & hot material away from the fuel tank.
- DO NOT smoke when inspecting the tank.
- Installed venting must meet industry standards.

5.1 TANK INSPECTION:

5.1.1 Daily:

- Check the tank for leaks.
- Inspect the emergency vent(s), including the seal area, for dust, debris, snow, or ice. Remove any obstruction that would prevent ventilation.

Inspect all vent components and surfaces for damage, corrosion, or excessive wear. If any is found, replace the vent.

5.1.2 Annually:

- Check the internal tank for leakage.
- Check the pump and meter for proper operation.
- Check the calibration of the meter, if equipped.
- Make sure the anchor bolts are securely attached to the concrete pad.
- Thoroughly clean the tank and pump.

5.2 FUEL METER MAINTENANCE

5.2.1 Calibration:

For accurate measurement and to prevent meter damage, the meter and piping must always be filled with liquid and be free of air.

Typically, fuel meters can be calibrated for either Litres or U.S. gallons. Calibration is normally required before installation, after disassembly, after wear due to normal operation, or when changing from gallons to liters.

1. If equipped, verify whether the meter installed on the tank is factory calibrated for Litres or U.S. gallons.
2. Select a container of known volume; a five gallon container or larger should be used.
3. Fill a container to the known volume.
4. Check the reading on the meter.
 - If the meter is incorrect, adjust the calibration screw to obtain either more or less diesel fuel.
 - Follow the OEM instructions for the specific meter being used.
5. Repeat Steps 3 and 4 until the calibration is correct.

5.2.2 Maintenance:

The fuel meter should operate maintenance free. However, certain liquids can dry out while in the meter housing, causing the meter to stop functioning. If this occurs, the meter should be thoroughly cleaned, as per instructions below.

1. Remove the meter from the pump.
2. Pour a flushing fluid into the meter and allow it to penetrate the internal components.
3. If possible, pump the flushing fluid through the meter.
4. If the flushing procedure does not fix the problem, the meter should be repaired by an authorized dealer or replaced.
 - Disassembly of the meter is not recommended.
5. Calibrate the meter following the calibration instructions in this section.

5.2.3 Storage:

If the meter is to be stored for an extended period of time, clean it thoroughly to help protect the meter from internal damage.

Section 6: TROUBLESHOOTING

This section contains a list of common problems, causes and offers quick solutions to those pump issues. For detailed instructions about the pump installation and operation, consult the manuals that were provided with the pump at the time of sale.

WARNING

- DO NOT open or attempt to repair the motor. Opening the motor will compromise the integrity of the Explosion Proof Construction and will void any existing warranty and certification (UL listing).
- Enure all power to the pump is turned off prior to performing any service or maintenance.
- In “Skid Tank” applications, make sure the tank is properly secured so it cannot shift or move when the tank is empty or full.

Problem	Possible Cause	Possible Solution
Pump Won't Prime	Suction line problem	Check for leaks in suction line
	Bypass valve open	Remove and inspect valve. Must move freely and be free of debris
	Vanes sticking	Check vanes and slots for nicks, burrs and wear
	Excessive rotor or vane wear	Inspect rotor & vanes for excessive wear or damage. Replace if necessary
	Outlet blocked	Check pump outlet, hose, nozzle & filter for blockage
	Vapor Lock	Reduce vertical and horizontal distance from pump to liquid. Remove automatic nozzle
Low Capacity	Excessive dirt in screen	Remove and clean screen
	Suction line problem	Check suction line for leaks or restrictions; it may be too small, too long or not airtight
	Bypass valve sticking	Remove and inspect valve; must move freely & be free of debris
	Vanes sticking	Check vanes and slots for wear
	Excessive rotor or vane wear	Inspect rotor & vanes for excessive wear or damage. Replace if necessary

Problem	Possible Cause	Possible Solution
Low Capacity	Hose or nozzle damage	Replace hose or nozzle
	Plugged filter	Replace filter
	Low fluid level	Fill tank
Pump runs slowly	Incorrect voltage	Check incoming line voltage while pump is running
	Vanes sticking	Inspect vanes and slots for nicks, burrs and wear
	Wiring problem	Check for loose connections
	Motor problem	Return to place of purchase
Motor stalls	Bypass valve sticking	Remove and inspect valve. Must move freely and be free of debris
	Low voltage	Check incoming line voltage while pump is running
	Excessive rotor or vane wear	Check rotor & vanes for excessive wear or damage
	Debris in pump cavity	Clean debris from pump cavity
Motor overheats	Pumping high viscosity fluids	These fluids can only be pumped for short periods of time (less than 30 minutes duty cycle)
	Clogged screen	Remove and clean screen
	Restricted suction pipe	Remove and clean pipe
	Motor failure	Return to place of purchase
	Pump rotor lock-up	Clean and check pump rotor and vanes
Motor Inoperative	No power	Check incoming power
	Switch failure	Return to place of purchase
	Motor failure	Return to place of purchase
	Thermal protector failure	Return to place of purchase
	Incorrect/loose wiring	Check wiring
Fluid Leakage	Bad O-ring gasket	Check all O-ring gaskets
	Dirty Shaft Seal	Clean seal & seal cavity
	Bad Shaft Seal	Replace seal
	Incompatible Fluid	Refer wetted parts list to fluid manufacturer
	Loose fasteners	Tighten fasteners
Pump hums but will not operate	Dirt in Pump cavity	Clean out pump cavity
	Motor failure	Return to place of purchase
	Broken Key	Remove all debris & replace key

Section 7: REFERENCE

LIMITED WARRANTY STATEMENT

Meridian Manufacturing Inc., (hereinafter referred to as Meridian) hereby warrants the tank(s) sold by it to be free from any defect in material or workmanship under normal use and service for a period of two (2) years from the date of shipment. Meridian also warrants the structural integrity of the tanks(s) for a period of ten (10) years from the date of shipment. Meridian's obligation under this warranty shall be limited to the repair or replacement only, FOB the original point of shipment, of any defective parts or portions of the tank or accessories manufactured by Meridian. Any warranty claim must be reported to the Meridian within two (2) years for general and coating claims or ten (10) years for structural claims, from the date of shipment and in the manner as referred to in paragraph 2 herein.

THIS WARRANTY IS SUBJECT TO THE FOLLOWING LIMITATIONS, PROVISIONS AND CONDITIONS:

1. This warranty does not apply to:
 - a. Any product sold by Meridian where it is used in areas exposed to corrosive or aggressive conditions including salt water, acids, alkaloid, ash, cement dust, animal waste or other corrosive chemicals.
 - b. Failures or defects arising out of damage during shipment or during storage on site.
 - c. Materials replaced or repaired under this warranty except to the extent of the remainder of the applicable warranty.
 - d. Damage resulting from misuse, negligence, accident or improper site preparation by others.
 - e. Products that have been altered or modified by others.
 - f. (in the case of coating failures) failure as the result of damage, lack of proper maintenance or failure to remove road salt or other contaminants that may have come in contact with the tank surface.
 - g. Products that have not been installed strictly in accordance with the Meridian's manuals and instructions.
2. The obligation of Meridian under this warranty shall not arise unless the Meridian is notified and this warranty is presented together with a written statement specifying the claim or defect within thirty (30) days after the failure is first detected or made known to the owner and within two (2) years for general and coating claims and ten (10) years for structural claims, from the shipment date. Meridian in its sole discretion shall determine if the claim is valid and whether correction of the defect or failure shall be made by repair or replacement of the materials.
3. The coating warranty is based on the Manufacturer's performance specification for polyester powder finishes and does not include repair of minor blemishes or rusting that is normally part of the general maintenance of the tank.
4. The obligation of Meridian hereunder extends only to the original owner and to the Meridian dealer to whom the materials may have been initially sold. This warranty shall not be subject to any assignment or transfer without the written consent of Meridian.
5. The customer shall acknowledge that it has made its own independent decision to approve the use of the supplied materials and also the specific fabrication and construction procedures utilized to complete the tank, and has satisfied itself as to the suitability of these products for this particular application.

6. The foregoing sets forth the only warranties applicable to said materials and said warranties are given expressly and in lieu of all other warranties, expressed or implied, statutory or otherwise, of merchantability or fitness for a particular purpose and all warranties which exceed or differ from said warranties herein are disclaimed by the Manufacturer.
7. The owners sole and exclusive remedy against Meridian shall be limited to the applicable warranty set forth herein and the endorsements, if any, issued together with this document and no other remedy (including but not limited to the recovery of assembly or disassembly costs, shipping costs, direct, incidental, special, indirect or consequential damages for lost profits, lost sales, injury to person or property or any other loss, whether arising from breach of contract, breach of warranty, tort, including negligence, strict liability or otherwise) shall be available to the owner or Meridian Dealer or any other person or entitles whether by direct action or for contribution or indemnity or otherwise.
8. The financial obligation of Meridian under this warranty shall be limited to the repair or replacement of the product as originally supplied and in no event shall exceed the original cost of the product supplied.
9. Meridian shall not have any obligation under any warranty herein until all accounts for materials, installation and erection of the said product thereof and for labor and other work performed by Meridian or its dealers have been paid in full by the owner.

For warranty information send an email to: warranty@meridianmfg.com

WARRANTY REQUEST PROCEDURE

1. The product must be registered with Meridian Manufacturing Inc.
2. The purchaser must contact the dealer, from where the unit was purchased, immediately upon discovery of any defects.
3. A completed Warranty Request (Claim) Form must be submitted by the dealer to Meridian's warranty representative for review and any subsequent course of action.
 - Warranty requests must be completed with ALL required information in order it to be considered for approval.
 - Send photographs of the entire piece of equipment, and of the specific area of concern.
4. Warranty repair work will only be performed by Meridian or an approved representative of Meridian. Warranty work completed prior to Meridian's approval will NOT be honoured. Failure to follow this procedure may affect any or all of this warranty.
5. All warranty requests will be adjudicated at the sole discretion of Meridian and in accordance with the terms and conditions of the warranty.
